

Learn in online interactive classes and thrive in a global environment!

GLP International Seminar (Australia) / International Seminar (Australia)

Theme: Global, Regional, and Local Perspectives in Asian Society

This course offers COIL (Collaborative Online International Learning) program set up with Monash University. The virtual classroom composed of students from various cultural, historical, and regional backgrounds allows for deepening our understanding of the dynamics of contemporary Asia. Within this unique setting, students can launch an interesting social issue to discuss, process the group work, and present the outcome to audiences. While the COIL program aims to extend our local views, the special sessions inviting guest speakers complement the course to address national and regional perspectives in Asia.

Quarters: Autumn (September-October, 2023)

Day and Period: Tuesdays, 2nd and 3rd periods

Credits: 2.0

Module: In-person/Online

GLP International Seminar (US) / International Seminar (US)

Theme: Cities, Politics, and Nuclear Weapons

This course is offered online in collaboration with Northwestern University in Chicago, U.S.A. The main lead of this course is Professor Hirokazu Miyazaki from Northwestern, with some Hitotsubashi professors also guiding topics from their research. The course deepens our understanding of the atomic bomb and the political and social impacts on the US and Japan, including citizen diplomacy and inter-municipal cooperation in this theme, through lectures and discussion sessions.

Quarters: Winter (January -March, 2024)

Day and Period: Two weekdays from 8:00-9:20 AM

Credits: 2.0

Module: Online live-streaming
